Importance: High

Hi Sbonelo,

Further to the Notification of availability of the Maintenance Management Plan for the Project 28(1) maintenance to the existing flood damaged stormwater structures and infrastructure (see attached for ease of reference).

I have submitted the "request to link client" to get the GA process going for the sites identified by the aquatic specialist and confirmed that "Given the highly modified nature of all affected watercourses, all activities fall within a Low Risk class (Table 5) and the would therefore require a General Authorisation." – also attached for ease of reference.

Please do not hesitate to contact this office should you have any questions or require any additional information.

Kind Regards/Vriendelike Groete
